InstaShower 7

New Launch: 48,000 BTU Tankless Water Heater

A special design for your RVs.

• Accurate temperature control

Added a constant temperature chamber to address water temp fluctuations.

• Staged combustion tech

Controls the flame intensity, not over heated in summer and warm enough for winter.

• Endless hot water

Produces a maximum of 2.4 GPM of hot water.

• High altitude mode

The water heater will operate smoothly even at 9800 feet altitude.

• No More Waiting

There is no need to waste 20-30 minutes waiting for hot water, now you can enjoy a hot shower anytime.
