

NANO

TOP SELLING FEATURES

1. A TRUE ultra-light weight line up with 11 travel trailer floor plans under 4,300lbs

- a. 8 floor plans under 4,000 lbs.
- b. All floor plans easily 1/2 ton & SUV towable
- c. 7.5' wide - easier navigation - better visibility
- d. Lower profile - Under 10' exterior height

2. CONSTRUCTION

AZDEL Composite - BOTH interior and exterior wall panels

- a. Virtually eliminates any chance for delamination
- b. 50% lighter than wood backed fiberglass
- c. **NO WOOD** = Will not rot, mold, or sustain water damage
- d. Increased R-2 insulation factor (brings sidewalls to a total of R-11)
- e. Eco friendly green product

Cross-Flex by Dacor Roof Membrane w/Dual Crowned Laminated Roof

- a. Strongest & lightest membrane in the industry- 10X tear & 30X puncture resistant
- b. Vacuum bonded and aluminum trussed - less chance of rot
- c. Stronger than conventional built roofs - Walkable
- d. Superior insulation factor keeping unit cooler and warmer (R-14 on 8' wides)
- e. Easier towability - not as top heavy (lower center of gravity)

Aluminum Framed Walls w/Double Lamination

- a. Both vacuum bonding and pinch rolling is superior - only mfg doing this
- b. Stronger construction being all one piece - solid wall
- c. All openings (i.e.) doors, windows etc. framed in aluminum
- d. Heavier density bead board foam insulation than competition
- e. Wood cleat inside of aluminum tube around the perimeter for superior hold

Laminated Floor

- a. Welded aluminum frame - lightweight durability
- b. Full cross-member support
- c. Double layer luan top decking - stronger & no squeaking
- d. High density block foam insulation
- e. Darco waterproof floor wrap
- f. No sagging and bouncing when walking around - aids in heating & cooling
- g. No channels cut in floor to weaken the overall floor structure - heating ducts in walls

Rear Wall Laminated & Vacuum Bonded

- a. **AZDEL** composite
- b. Backed and ready for a ladder
- c. Increases durability of unit

Enclosed Underbelly w/Forced Air Heat (Dual Axle Only)

- a. Dedicated heat duct to underbelly
- b. Not only enclosed but provides Insulation
- c. Longer camping season
- d. Protective layer from rodents and debris

Larger holding tanks and cargo carrying capacity than competitors

- a. 52 gallon fresh (na 17TH/16R) - longer uninterrupted camping experience
- b. Heavier axles and radial tires - 15" tires on all models with 4400# axles
- c. 5" frame or larger on all models
- d. Why buy light weight when you can't load it up with your stuff due to small carrying capacity

3. OFF GRID PACKAGE (mandatory)

- a. Dual 20 lb. LP tanks w/cover
- b. High velocity 10" power roof vent
- c. 200 watt solar panel w/30 amp controller
- d. 12V outlets (pass-thru and outside kitchen)

4. Green Manufacturing - EMERALD CERTIFIED

- a. Only **THREE** mfg. in this category - **APEX**, Lance & Airstream
- b. Low VOCs (volatile organic compounds) - particulars in air
- c. Less wood, recycling program & processes
- d. Indoor air quality

5. INTERIOR

Full Size Features in a Small Compact Unit

- a. Separate sink, shower & toilet (no wet baths)
- b. Full size dinettes w/storage below
- c. Roof mounted AC
- d. 8 cu ft, 12 volt refrigerator
- e. Direct vent furnace
